-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Art Rejections:**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-5, 9-10 and 20-24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hiroi, U.S. pat. No. 6,256,071.

Per claims 1-2, 4 and 9-10, Hiroi discloses a system to facilitate capture of desired broadcast data comprising:

a) a transportable object (packet) that carries the real-time target broadcast data associated with an event or category, e.g., webcasting, TV broadcasting, etc.,

Art Unit: 2154

b) metadata (header) encapsulated within the transportable object which enables a user to locate the broadcast data for monitoring recording target data during broadcast (see col 5, lines 25-65).

Per claim 3, Hiroi teaches storing data including event or category in memory (see col 7, lines 63-65). It is noted that a stored event is considered as a previous broadcasting event.

Per claim 5, Hiroi also teaches providing a broadcaster for broadcasting data stream that includes target data (see col 4, lines 38-61) and a plurality of data collection devices that collect and provide data indicative of the event or category (see col 5, lines 11-24).

Claims 20-24 are similar in scope as that of claims 1-5 and 9-10.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various

Art Unit: 2154

claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 6-8, 11-19 and 25-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiroi.

Per claim 6, Hiroi does not explicitly show specific means/step to aggregate and packetize data from a plurality of sources.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize any conventional data aggregation and packetization means in Hiroi because it would have enabled collecting and providing target data to users from different sources (see col 5, lines 11-65).

Per claims 7-8, Hiroi teaches providing timestamp in the packet (col 5, lines 33-34) and a multiplexer for collecting/aggregating target based upon the identifying data (see col 5, lines 1-10).

Claims 11-19 and 25-27 are similar in scope as that of claims 6-8.
